RE: Continuing Operation
Well Sampling Information

Dear Mr. King:

On March 28, 1990, Messrs. Mack Croft and David Rupp inspected your facilities. Cyanide was reported in the water of two of the monitoring wells near pads 1 through 5. Lab analysis of the cyanide concentrations was also shown. The finding of cyanide in these monitoring wells is a matter of concern.

We requested earlier, in our letter of April 27, 1990, that a map be provided showing the well locations, lab testing results, as well as any other new information regarding pollutants in the monitoring well system. This information has not been received as yet. This information must be received by us on or before June 14, 1990. Otherwise, appropriate action will be considered to protect the ground water.

Sincerely,

Utah Water Pollution Control Committee

Don A. Ostler, P.E.
Executive Secretary
